**Monday**
- **Objective**: Lesson 2-8 Explaining Multiplication and Division Related Facts
- **Activity**: Use related facts to solve sentences. Apply and recognize the following properties: Mult., Identity, Mult. Inverse, and Mult. Property of Equality.
- **Assign**: p. 117-120 (2-36)

**NE SS#**
- **Objective**: Lesson 3-3 Adjacent Angles and Vertical Angles
- **Activity**: Draw and analyze drawings of angles. Use algebra to represent and find measures of angles. Give Justifications for conclusions involving angles.
- **Assign**: p. 130-132 (2-32)

**NE SS#**
- **Objective**: Lesson 3-3 Translation of Data
- **Activity**: -use translations to describe and analyze data and statistics.
- **Assign**: p. 169-171 (2-16) Worksheets 7-9

**Tuesday**
- **Objective**: Review of Lesson 7,8
- **Activity**: -Review of Concepts in lessons 7 & 8
- **Assign**: Worksheets 7,8

**NE SS#**
- **Objective**: Review of Lessons 1 through 3
- **Activity**: Review Worksheets 1-3
- **Assign**: Review Worksheets

**Wednesday**
- **Objective**: Chapter 2 Review
- **Activity**: -Review of concepts in Chapter 2
- **Assign**: Review Worksheets p. 136-138 (2-22) Quiz over (sec. 1-3) Test

**NE SS#**
- **Objective**: Chapter 3 Quiz(sec. 1-3)
- **Activity**: -Use algebra to represent and find measures of angles. Recognize and use the postulates of algebra.
- **Assign**: p. 136-138 (2-22)

**Thursday**
- **Objective**: Chapter 3 Quiz over sections 1 through 3
- **Activity**: Review concepts for Lessons 1 through 3
- **Assign**: Chapter 2 Test p. 176-178 (2-24) p. 154-156 (2-26)

**NE SS#**
- **Objective**: Chapter 3-4 Algebra Properties used in Geometry
- **Activity**: Describe the effects of translations of functions and their graphs. Describe and identify symmetries and asymptotes of graphs.
- **Assign**: p. 176-178 (2-24)

**Friday**
- **Objective**: Lesson 3-1 Graphing Linear Patterns
- **Activity**: -Solve problems involving equations of the form y=mx+b using tables or graphs -Recognize and use the postulates of algebra -Give Justifications for conclusions involving angles and segments
- **Assign**: p. 132-134 (2-20)

**NE SS#**
- **Objective**: Lesson 3-5 Justifying Conclusions
- **Activity**: Use the Graph Scale-Change Theorem to find transformations images. Describe the effects of translations and scale changes of functions and their graphs.
- **Assign**: p. 142-144 (2-24)

**NE SS#**
- **Objective**: Lesson 3-5 Graph Scale Change Theorem
- **Activity**: Recognize properties of Linear functions. Model linear combination problems
- **Assign**: p. 171-173(2-22) p. 160-162 (2-16)
